INTRODUCTION

The Move&Act **Photo-Voice Contest** is part of the Erasmus+ project "**Move & Act- Empower Youth through Entrepreneurial and Digital Skills**". This initiative aims to develop digital, creative and entrepreneurial skills among young people, especially those who are at risk due to disabilities, migration status or as NEETs (Not in Education, Employment, or Training). The contest provides a **platform for participants to express their challenges and experiences through photography**, thereby improving their employability, fostering a European identity and **encouraging interaction** with the local, national and European community.

Purpose of Photo-Voice

Photo-Voice is a qualitative research method that combines **photography** and **storytelling** to document and address social issues. This method was developed in the 1990s by Caroline Wang and Mary Ann Burris and enables communities to **share their experiences** and **make their voices heard**.

Participants are **invited to take photos** that reflect their experiences, challenges or perspectives on specific topics such as poverty, unemployment, education, environmental issues and more. These photos will be accompanied by narratives that **contextualise the images and provide deeper insight** into community issues.
